## Mirra Sync and Share Personal Server

### Continuous backup for networked computers

The Mirra Sync and Share Personal Server brings new levels of data protection, continuous automatic backup, file sharing, and anywhere Internet access to networked computers.

- Protect all your networked computers
- Access your files from anywhere via the Internet
- Share files with friends, family, and colleagues easily
- Sync content automatically between computers
- Share content easily between Macs and PCs

Seagate is the world's largest manufacturer of disc drives.

## Mirra Sync and Share Personal Server

### Sync your digital content, *automatically*

Mirra automatically synchronizes content—including entire data libraries—between networked computers. Receive the latest file updates as they happen.

### Share files locally or over the Internet, *securely*

Sync and Share software and online service lets you share files securely with friends, family, and co-workers. Password protect your folders and provide access to them via Mirra.com.

### Protect your networked computers, *continuously*

Mirra continuously backs up the content on your networked computers. You choose which folders to protect and Mirra does the rest—including saving as many as eight previous file versions.

### Access your data, *remotely*

Stay connected to your content with secure remote access via Mirra.com. Retrieve your files from wherever you are—whenever you want them.

### Enjoy setting up your Mirra, *effortlessly*

Set up your Mirra in minutes—no special technical knowledge is required.

### MirraGuard Data Guarantee

If one of your computer hard drives fails, all data backed up on your Mirra Sync and Share Personal Server will be restored. We guarantee it. Seagate will assist you in the restoration and, if necessary, Seagate's Data Recovery Service will commit up to \$1,000 to recover and restore your data. Details online at [www.seagate.com](http://www.seagate.com).

### Mirra limited warranty

One year parts and labor.
