When referring to drive capacity, one gigabyte, or GB, equals one billion bytes and one terabyte, or TB, equals one trillion bytes. Your computer's operating system may use a different standard of measurement and report a lower capacity. In addition, some of the listed capacity is used for formatting and other functions, and thus will not be available for data storage. Actual data rates may vary depending on operating environment and other factors. Nytro products are not intended for use in life-support appliances, devices, or systems. Use of any Nytro product in such applications without written consent of the appropriate Seagate officer is prohibited. Seagate reserves the right to change, without notice, product offerings or specifications. Seagate reserves the right to change, without notice, product offerings or specifications.
